

Creating health, wellness and equity for all

The San Diego Accountable Community for Health (ACH) is a groundbreaking multisector initiative working to create community wellness and equity. We are redefining our local health system to extend beyond traditional institutions like hospitals and health plans. We bring together over 100 committed stakeholders including clinical providers, public health, schools, social service agencies, behavioral health, business, community organizations, and others in a collective effort to create wellness in our communities.

Guiding Statements

Mission

To create a "wellness system" that ensures individuals, families and communities in San Diego have access to all they need to create a lifetime of health and wellness.

Vision

Health, wellness and equity for all of our communities, regardless of zip code.

First Aim

As a first step in our journey to divert the focus from disease to wellness, we are starting with the aim of achieving ideal cardiovascular health across the lifespan through prevention, education and treatment.

Our Unique Value

- We are a **collaborative** creating health and wellness for all San Diego communities.
- In this work, we are **accountable** to each other and to the communities we serve.
- Our ongoing journey begins with trust. We **embrace our diverse histories**, cultures and experiences as strengths from which to build health equity.
- We are focused on **linking clinical and community resources** in new ways that lead to better health and wellness.
- We are creating a **lasting infrastructure** that invests in the health and wellness of our communities.
- We are committed to **sharing information and data** for making informed decisions.
- Measuring our collective progress is central to our work.
